

ONE-PAGE DECISION WORKSHEET

Does this capability earn the right to scale?

Make outcome, data authority, AI role, human authority, controls, integration, operations, economics, adoption, and reuse explicit before promotion.

1. Outcome and owner What decision or workflow changes? Who owns the outcome and baseline?	2. Data authority Which sources are authoritative? What are lineage, quality, access, and retention boundaries?
3. AI role and evidence What does the model, RAG system, or agent do? What evaluation and grounding evidence is required?	4. Human authority Which decisions remain human? Where must the system abstain, escalate, or allow override?
5. Integration and exceptions Which APIs, events, systems, and RPA steps are involved? How are failure and exceptions handled?	6. Trust and control What privacy, security, compliance, threat, and review controls apply?
7. Operations and economics Who supports it? What are SLOs, incident path, rollback, unit cost, and value measures?	8. Adoption, reuse, and disposition How will retained use be measured? Promote, revise, hold, retire, or exempt - and why?

Final disposition

■ Promote ■ Revise ■ Hold ■ Retire ■ Exempt

Decision owner: _____ Review date: _____ Next evidence checkpoint: _____
