

ROLE-ALIGNED IDENTITY

Make complex systems become reliable work.

Operator-technologist who connects AI, data, engineering, controls, and adoption into governed operating mechanisms. Direct experience spans AI-enabled operations, high-reliability engineering, enterprise workflows, and scaled execution.

Capabilities

Enterprise AI and data architecture RAG and agentic patterns; human-in-loop design; governance and risk.	Operational architecture Observability, reliability, cost visibility, API/ERP/CRM integration, architecture reviews, and adoption.
--	--

Experience selected for the mandate

Vape-Jet - Director of Operations | 2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a robotics and machine-vision environment with approximately 1,000 fielded robots informing feedback loops.

DudeWorth - Founder / AI and Automation Advisor | 2017-Present

- Develops AI-readiness frameworks covering value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflows using structured context, retrieval, agents, human judgment, escalation, decision records, evaluation, and governance rails.

Amazon - Operations Management / Site Leader | 2014-2018

- Led Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built operating cadence, labor planning, throughput visibility, escalation, standard work, and Lean/Gemba mechanisms.

Decisions this evidence helps make

Standardize / localize Which patterns become the paved road, and where does scientific context justify bounded variation?	Promote / hold What evidence warrants enterprise reuse, and which authority, risk, cost, or ownership gap should stop scale?
---	--

TECHNICAL AND HIGH-RELIABILITY FOUNDATION

Evidence that transfers across the architecture boundary.

Compunetics - Director of Operations and Engineering Management | 2000-2013

- Progressed through R&D; program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex programs in high-reliability electronics.
- Built quality systems, root-cause practices, measures, and controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data Operations | 2018-2022

- Led regulated operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based aerial inventory and computer-vision concepts; designed governed medical delivery and chain-of-custody concepts.

Cardinal Building Products - Regional Director | 2021-2023

- Built the company's first remote regional operation and modernized CRM, commercial, fulfillment, logistics, digital marketing, and online-buying workflows.

Architecture posture and boundary

Direct work

Prompts, workflows, AI-assisted operations, agentic concepts, retrieval patterns, evaluation logic, dashboards, Python, SQL, JavaScript, TensorFlow, Tableau, Odoo, Jira, HubSpot, Slack, and GIS.

Claim boundary

Does not claim production ownership of Thermo Fisher's exact AWS/Azure, Databricks, Dataiku, vector-database, or UiPath estate. Proposes proving fit through one bounded reference pattern.

Education and credentials

University of Pittsburgh - Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.

Google AI Essentials | IBM Enterprise Design Thinking Practitioner | Six Sigma Certification | OSHA 10.

Complementary leadership

Enviro Social Capital, Chairman: public-private sustainable infrastructure and impact-finance work. IEEE Pittsburgh Chapter Chair: programming connecting industry, academia, electronics, manufacturing, STEM, and emerging technology.
