

CANDIDATE IDENTITY

Make complex systems become reliable work.

Operator-technologist who connects AI, data, engineering, controls, and adoption into governed operating mechanisms. Brings direct experience in AI-enabled operations, high-reliability engineering, enterprise workflows, scaled execution, and cross-functional technical translation.

ROLE-ALIGNED CAPABILITIES

Enterprise AI and data architecture	RAG, agentic and human-in-loop patterns
Governance, access and risk controls	Observability, reliability and cost visibility
API, ERP, CRM and workflow integration	Architecture reviews and decision records
Reference patterns and reusable frameworks	Stakeholder influence and adoption

EXPERIENCE SELECTED FOR THE MANDATE

Vape-Jet

Director of Operations | 2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing operating feedback loops.

DUDEWORTH

Founder / AI and Automation Advisor | 2017-Present

- Develops AI-readiness and opportunity frameworks covering value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.

AMAZON

Operations Management / Site Leader | 2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms using Lean and Gemba practices.

DECISIONS THIS EVIDENCE HELPS MAKE

STANDARDIZE Which architecture patterns and controls should become the paved road?	LOCALIZE Where does scientific context justify bounded variation?
PROMOTE What evidence warrants movement from proof to reusable enterprise capability?	HOLD Which unresolved authority, reliability, risk, cost or ownership gap should stop scale?

TECHNICAL AND HIGH-RELIABILITY FOUNDATION

Compunetics

Director of Operations and Engineering Management | 2000-2013

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

ZEUSVU

Chief Pilot, Autonomous Systems and Aerial Data Operations | 2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence; designed governed medical delivery and chain-of-custody concepts.

CARDINAL BUILDING PRODUCTS

Regional Director | 2021-2023

- Built the company first remote regional operation and modernized distributed CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.

ARCHITECTURE POSTURE AND BOUNDARY

DIRECT WORK

Prompts, workflow design, AI-assisted operations, agentic concepts, retrieval patterns, evaluation logic, dashboards, Python, SQL, JavaScript, TensorFlow, Tableau, ERP/Odoo, Jira, Confluence, HubSpot, Slack, GIS and mapping.

CLAIM BOUNDARY

Does not claim production ownership of Thermo Fisher specific AWS/Azure, Databricks, Dataiku, vector database, or UiPath estate. Proposes proving fit through one bounded architecture review and reference pattern.

EDUCATION, CREDENTIALS AND TOOLKIT

University of Pittsburgh - Bachelor of Science

Academic grounding includes materials science, physical chemistry, and biology-related studies.

Google AI Essentials | IBM Enterprise Design Thinking Practitioner | Six Sigma Certification | OSHA 10

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

COMPLEMENTARY LEADERSHIP THROUGH-LINE

ENVIRO SOCIAL CAPITAL - Chairman of the Board | 2014-2017

Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, civic transformation, and evaluation of a \$200 million Social Impact Bond feasibility concept.

IEEE - CMPT and EDS Pittsburgh Chapter Chair | 2012-2016

Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology through conferences, seminars, tours, and technical programming.
